

Principal Investigator position at the IBRI Diabetes Center/Lilly Diabetes Center of Excellence

Don't just research...**Discover!**

We are Indiana Biosciences Research Institute (IBRI). We deliver research that has a meaningful impact on the lives of people through new solutions that address diabetes, cardiometabolic diseases and poor nutrition. Working at the IBRI means being part of a team of renowned scientists who are helping to improve Hoosier health. It also means you are not alone. In addition to your experienced team members, you have collaborators from the Indiana life sciences ecosystem.

Our colleagues bring diverse ideas and experiences to our work, are dedicated to living out our mission every day and are passionate about their research. So passionate that it often carries out into the community through work with JDRF, volunteering at local nonprofit organizations and helping to educate the next generation of scientists.

The IBRI's vision is to build a world-class organization of researchers, engineers and business professionals that catalyze activities across the Indiana (and beyond) life sciences community. To achieve that vision, we look for curious and collaborative team members who are energized by innovation, guided by integrity and inspired by diversity.

The Opportunity:

The Lilly Diabetes Center of Excellence (DCOE) at the IBRI is recruiting promising young **principal investigators** (PI) to start their own independent laboratories under excellent research conditions.

The Lilly DCOE is recruiting high-potential PIs at the IBRI in Indianapolis, Ind., who are interested in pancreatic beta cell research, particularly related to iPSC-derived beta cells and the crosstalk between beta cells and the immune system in type 1 diabetes (T1D).

- The PIs will receive five-year sponsored appointments at the IBRI, subsidized by Lilly, and faculty appointments with a tenure track perspective at the Indiana University School of Medicine.
- Each appointed PI will pursue their own area of research with full academic freedom. Lilly will provide opportunities for close collaborations, including access to drug discovery tools and expertise, to allow faculty to rapidly explore the translational potential of their research.
- The LDCE will also serve as a bridge between academia and industry by providing opportunities for interaction, training, and mentoring across the IBRI, Lilly and IU School of Medicine.

Compensation:

Competitive salary and comprehensive benefits offered, commensurate with experience.

Equal Employment Opportunity:

The IBRI provides equal employment opportunities to all employees and applicants and does not discriminate on the basis of age, race, color, religion, gender, sexual orientation, gender identity, gender expression, national origin, protected veteran status, disability or any other legally protected status.
